hi friend. i was just browsing this forum and found your post. I have a similar problem too. I use iGo Primo to navigate and i am able to navigate and zoom the map as long i press the left and right keys. The issue is when i touch & hold the screen and move the mouse it happens. Once i am done navigating with the mouse, i want to exit the map. It is not possible to exit the map once you navigate if you allow the mouse cursor to be. Where do you get the latest

---

version of this app? I have the latest version for winmx. Can you please let me know how to solve this? I am using Windows XP SP 3 with WinCE 6.0. How can I see like SMS messages from my Pocket for Windows Mobile on my phone? And the.exe for Pocket says that it is the wrong version to run on my phone, though I've done a Clear Cache and attempt to download the.apk. Is there a work around or do I need to get a Windows Mobile phone.

---

I'm getting all sorts of errors trying to install it. Will the Dynavin on the dynavin be able to run my WinCE apps? I have a Dynavin psp with winCE 6.0. I just bought a primo and it's hard to navigate and I cant seem to do it. So, maybe there are any tips? How do I update the map in the PRIMO maps? Dear,I went to the map and it shows the Primo map but my device is not compatible to view it. I also tried to download the.exe file but it says it is not

---

compatible. Also, where can I get the latest version?

**ATTENTION:** This app **ONLY** supports the Primo 24 Wince and has no NAV / Map support for Primo 200D / Primo 350D / Primo 430D. You can find the "WIN CE MapKiller" in the support section of the PRIMO developer web site Primo 200D / Primo 350D / Primo 430D. See this support thread for more details: For Primo Wince/WinCE info: All Primo products: 570a42141b
