

It's 1981 and Earth is at war with an enemy invisible to human eyes. A war fought by a technological marvel: "Humanity's most advanced army of robots." In his search for a cure, the wealthy man Pierre Malévaïl is abducted by Agents of the Queen's Army. When his robot body is stolen, he will disappear into the blackness of space-time and be left to develop a bond with an AI that considers him her master. But now that they have Pierre Malévaïl as a hostage, the Queen's Army is developing the greatest weapon in history, arming it with humanity's most powerful spaceship. Betrayed by his wife and trapped in an underground base, Pierre Malévaïl will be forced to watch the annihilation of his ship and existence as humanity falls to the impending war, now destined to last beyond his lifetime. In other words, you're a private pilot, and soon things are going to go horribly wrong... 'Helter Skelter' Helter Skelter is about to release the nearest thing you will get to a Peter Jackson remake of WOTW with an improved, much more beautiful engine that lets you enjoy hours and hours of vibrant sex, thievery, rape, murder, mayhem, etc. Helter Skelter is a 9/12 to 15-year-old young adult RPG with the style of early 1990's console RPGs (Shenmue, Shin Megami Tensei, Final Fantasy, Persona, Fire Emblem, etc.) and the content of the late 1990's/early 2000's mature games (Deus Ex, Devil May Cry, Hitman, God of War, etc.) However the Helter Skelter engine is different enough to be able to have more brutal violence and sex scenes, both with NPCs and with each other. There are three main paths for your character: Common, Thief, and Gunner. Each of the three paths allows for different play styles. Gameplay is both battle and sex simulating. It's time to experience the no stress femboy Game of the Wild West for PC! \$24.99 \$12.99 Are you tired of having to wait for a week between updates? 5 stars!"> For those who felt that 2017 hasn't been the best year, that it was hard to stay motivated during the year, that the world is turning upside down and that there's less and less hope, the best game of the year, the best game of 2017 is here. In 2017, I did exactly what I said I would do. I challenged myself and I challenged the many traits that I'm not fond of: shyness, timidity and a lack of confidence. I wanted to really step out of my comfort zone and be fully myself; and I think I did it by creating a game. To those who liked it, a big "thank you". To those who didn't? Well. We can't be friends anymore; but you'll always be a dear memory. Happy new year to all! #1 P.S. to those who'd rather not see our faces, we removed our names and introduced ourselves as "unknown". But we'd like to thank each and everyone of you for the positive feedback we received! You made us happy and that's the most beautiful gift one can receive. If there's anything I want to say during this year, it's this. Before I started the NieR▯ Podcast, I knew I wanted to create a game with an amazing team. My dream was to work with the team from NieR▯ so that we could make something out of it and the cool thing is, we're actually doing that. I had a lot of different ideas for this game. One, of course, was to create a game with my old team, Gekkouka, as we finished the NieR▯ game only a few months ago. Yet, since the beginning, I had a different idea in mind. I wanted to make a game that was slightly different from NieR▯; a game that I could create with a small team of people who aren't necessarily known by the gaming world and make something that I could be proud of. A game where I'm not worried about the perception of people about the game being related to NieR▯, simply
