"For over 10 years, we have worked with the top sports scientists to make games more lifelike, but we wanted to step it up a notch by capturing real-world movements in high-accuracy motion capture suits and filming at 1080p resolution, so we could capture every detail of a football player's every movement. "By using these elements in our game, we want to make FIFA more immersive than ever before," said Alex Short, Chief Competitive Officer, EA SPORTS. "Using real-world player movements rather than working with a pre-set player model will enable us to capture more natural, dynamic movement from players and make them appear even more realistic to fans." New Kinetic Skills New features have also been added to FIFA 22 to make the game even more realistic, including thousands of new animations. Below are some of the new additions to the game. * Goalkeeper slide tackles are now far more fluid and realistic to capture the moments a goalkeeper expertly avoids an oncoming shot from the open goal. * IKON Academy expansion. The IKON Academy expansion significantly enhances the player experience and interaction on the pitch. The IKON Academy allows users to train for life as a professional player with new kits, training ground and a fully-equipped team facility. * Over 100 new player models, including many real-world player movements. * Over 50 new player animations and new animations on new areas of the pitch, as well as new matchday activities. * New animations and matchday activities have been added to the goalkeepers and pitch occupations in all FIFA Ultimate Team modes, as well as to the new international stadiums in the International Ultimate Team mode. * New AI soccer play: The AI now select the right set of plays and counter-tackles at the right times. Players make better decisions and goalkeepers make better decisions when making key saves. * Re-balanced behaviour of all Brazilian national teams at World Cup: Brazil's playstyle is more aggressive and territorial now, with the average Brazilian team completing more attacking passes and making more crosses. * Revamped dead ball gameplay: If the ball comes to a dead ball situation, players are more confident in using their patented skill moves. There's also improved animation to simulate the frenetic nature of dead ball situations as players are more likely to slip

Fifa 22 Features Key:

- Create your own unique player within Ultimate Team. Use the power of real-life motion-capture data to make players change how they move on the pitch.
- Hunt down the latest equipment using the all-new Transaction Market. Find the next upgrade for your strongest attributes, or repurpose cool new boots and shirts as an entirely new outfit - even trade them in for your graded gear to stack up on your fees and make some money
- Take your tactics to the next level with enhanced Player Intelligence in the Carousel. Show off your dedicated tactics to unlock rewards; watch what other players do to learn what they'll do, then plan your next move around the opposition
- Choose from a renewed range of Manager types in Managerial Challenges, with an emphasis on the tactical variation to quickly adjust to your opponent. Recreate more-intimate matches to lead your side to victory
- The most authentic FIFA ball-to-ball physics and ball-tricks in franchise history. Create new moves and use old tactics on your favourite teams, with more goals on the ball, passes that go further and accelerations and styles that work
- THOUSANDS of officially licensed teams. 20 sponsors. Even more licenses in development - expect to see many more in 2018.
- Earn your stripes and become a Pro. Scout your opponents and find talents hidden in plain sight on the Transfer Market to rise the ranks within your club and climb up the Pro ladder
- Featuring hyper drive eXtreme and physically based animations, guarantee to immerse your player more. Pause the game at just the right moment to create a clean, dynamic and explosive move. Lean and kick, hurdle and slide - to get where you want to be on and off the pitch. Dive, roll, and slide off-ball to steal the ball. Master your surroundings to turn the ball into a weapon; tackle and steal like never before. Incomparable animations give even the most committed real-life footballer a new level of freedom
- The first major motion capture technology integration with FIFA. Enjoy the new technology-powered gameplay speed, controlled by the ball in-motion, and the ability for the AI to change play at any time, even when the player is carrying the ball, to see the competition preparing to counter
