Experience the fast-paced, mid-century rail journey where the people and politics of the Northeast really start moving. Control both lines. Control one, or switch back and forth between both in real time. Whichever route you choose, the rapid-fire highway of the Northeast Corridor is yours to explore. The Northeast corridor

is a legendary artery for the transportation of goods and people. Open to international trade with its strategic location at the apex of the northeastern quadrant, and surrounded by huge expanses of farmland, the corridor was first opened to trains in 1835 when the Boston and Lowell Railway began running through the midst of Connecticut's cornfields. Carved into the rocky face of the Androscoggin River and looking like a sharp, knife-like protrusion from the ground, the

Boston and Providence Railroad (B&P) runs from the heart of Massachusetts down into Rhode Island to the seaport of Newport, laying claim to some of the most scenic commuter routes in the northeastern United States. With its wide-open spaces, a state-of-the-art locomotive and a collection of modern passenger cars, the Boston and Providence Railroad is an unforgettable experience for train enthusiasts and commuters alike. Rush Hour is the first game in Dovetail

Games' expansive rail and train simulation series and is supported by training and scenario packs for train drivers, conductors, engineers and maintenance staff. As a passenger, experiencing Rush Hour is easy. Regardless of the state that you travel to, the scenery changes just as the passenger traffic changes. As well as the direction, you can choose the time of your journey to play at a time of day which suits you; dawn, midday or dusk. The length of your journey can be adjusted

too, so you can choose a longer journey and complete it in less time, or a shorter, potentially more thrills-filled, route in the same amount of time. Whatever you choose, the Boston and Providence Railroad will be waiting for you. Resident Training app saved my current hospital stay for my Grade 1 surgery! They used the app during the pre-surgery planning sessions, as a way to communicate homework, and did a post-surgery evaluation of the app in order to provide more direct feedback. The app was really effective and quickly allowed me to review and learn the information relevant to my stay. They also gave the impression that the app and its use made a difference in the experience for my

family; they were also given lots of positive feedback. Finally, they seem to really value the app as it lets them quickly roll-out the app across their organization. I recommend this app to help improve patient experiences but I'd also recommend that if you have a participant who has any sort of visual impairment they need to have a unique login. Nonetheless, this is a great app for someone who wants to find out more about their health! Thank you, LIVESTRONG. THANK YOU For Your App! I "LOVE" the LIVESTRONG. THANK YOU For Your App LIVESTRONG app! Roni L. Administrator My Account Executive team has so far been excellent. They anticipate our needs and provide a wonderful customer experience. I could not have been more pleased with their support and assistance during a very difficult time in my life. I found the live chat to be very attentive, informative, and knowledgeable. LIVESTRONG was instrumental in helping me make informed health related decisions. They went above and beyond to help me through my medical journey! Thank you!" CHRISTINE P. I was very pleased with this app. My technician

was wonderful and efficient, because I have numerous medications. She had to have a lot of quick questions answered and she went over a lot of the things that I should be aware of. Please add onto, your Florida state registry, where you can document missed medical issues, and anything that was misdiagnosed or missed altogether! Something as simple as an address changes can mean there is an issue for that patient and they could be much more health savvy if they could know about a problem that was not caught. This is truly a HUGE point for me, as this was the case with me and my husband. We had a test done that we were scheduled to go get the results in 60 hours, in a matter of 24 hours we were up in Boston. In two days, I found the diagnosis of my patient: cancer and a rare cancer to
